

Fidelity Funds - Global Income Fund 富 達 基 金 - 環 球 收 益 基 金

29 February 2024 年2月29日

- This fund invests primarily in a portfolio of global fixed income securities.

 The fund is subject to risk to capital and income, foreign currency risk, Chinese Renminbi currency and conversion risk, risk relating to RMB hedged share class and risks associated with debt securities, including Credit / Counterparty, Interest Rate, Downgrading, Valuation and Credit Rating Risk. The fund is subject to sovereign debt risk of certain countries within the Eurozone, higher volatility, liquidity, currency and default risks. The fund may invest in debt securities rated below investment grade or unrated securities which are subject to lower liquidity, higher volatility, heightened risk of default and loss of principal and interest than higher-rated/lower yielding debt securities. Although the fund will generally invest in income-producing securities, it is not guaranteed that all underlying investments will generate income. Higher yields generally mean that there will be increased potential for capital appreciation and / or depreciation for fixed income securities.

 The fund may invest in instruments with loss-absorption features which are subject to greater capital risks, liquidity, valuation and sector concentration risk. The fund may invest in CoCos, which are highly complex and are of high risk. CoCos are a form of hybrid debt security with loss-absorption features that are intended to either convert into equity shares of the issuer or have their principal written down upon the occurrence of certain 'triggers'. The fund may also invest in solor not preferred debts, which may be subject to write-down upon the occurrence of a trigger event and may result in total loss of principal invested.

- invest in senior non-preferred debts, which may be subject to write-down upon the occurrence of a trigger event and may result in total loss of principal invested.

 The use of ESG criteria may affect the fund's investment performance and may result in a return unfavorably to similar products without such focus. The ESG characteristics of securities may change over time, which may require the Investment Manager disposing of such securities when it might be disadvantageous to do so, which may lead to a fall in the fund's value. Evaluation of sustainable characteristics of the securities may involve the Investment Manager's subjective judgment, which is subject to a risk that the fund could have indice exposure to issuers who do not meet the relevant characteristics, and such characteristics of a security can change over time.

 The fund's net derivative exposure may be up to 50% of its NAV, the use of derivatives may involve liquidity risk, counterparty credit risk, volatility risk, valuations risks and over-the-counter transaction risk, at times. Exposure to financial derivative instruments and its leverage element may lead to a high risk of significant loss by the fund.

 For dividend of certain share classes, payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the NAV per sharef unit. For the hedged share class, the distribution amount and NAV of such share class may be adversely affected by differences in the interest rates of the reference currency of the hedged share class and the fund's base currency, resulting in more distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share more distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share
- ousses.

 Investors may suffer substantial loss of their investments in the fund. Investor should not invest in the fund solely based on the information provided in this document and should read the offering documents, including Product Key Facts (including the risk factors) for details.

Product Key Facts Fund announcements

基金通告

For AHMDIST(G)(hedged) share class, dividend distributions may include a premium when the interest rate of the hedged currency is higher than the fund's reference currency interest rate. The Board expects to recommend distribution of substantially the whole gross Investment income, and may determine the extent dividends may be poid out of realised and unrealised capital gains as well as capital. 就从股土每月派息(G)(對沖)股份類别而言,股息分派可能計入因對沖貨幣的利率高於基金報價貨幣利率而產生的溢價,以及因對沖貨幣利率低於基金報價貨幣的利率而出現的折讓。董事會預期將就幾乎所有的總投資收益建議派發股息,並可能釐定從已變現及未變現資本中撥付的股息水平。

Top issuers table: credit derivatives relating to any specific issuer are included, but derivatives relating to government bonds and to bond indices are excluded. Geographic exposure basis is domicile of issuer. Running Yield describes the income investors get from their portfolio as a percentage of market value of the securities and does not include the impact of fees. Effective Duration takes into account all investments in the fund, including derivatives. Average Credit Rating takes into account all investments in the fund, including derivatives. The weight assigned to each issue is equal to its market value weight. The credit rating table excludes derivatives. Currency exposure is after hedging. 持有量最高之整行商的信贷行生工具,可以各自市值作為比重計算。地區分佈根據發行商的信贷行生工具,可以各自市值作為比重計算。地區分佈根據發行商的注册地分類。現時收益率為投資者所得收入與其投資組合市值之百分比比較。現時收益率並未反映收費之影響。有效存續期涵蓋基金中的所有投資(包括衍生工具),並以各自市值作為比重計算。《信用評級分佈遊話分件工具。貨幣投資分佈以對沖後的貨幣作業。
