 (Outstanding Achiever)¹

¹Benchmark, awarded in Feb 2023 to the company Franklin Templeton Investments. Based on fund performance for the period between Jul 2021 to Jun 2022. For the details of the award, including the assessment of methodology and judging criteria, please refer to the official award website. Franklin Templeton paid entry fee for the award.

Offering Documents

Risk Considerations

INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the amount originally invested. Past performance is not indicative of future results.

- Franklin Income Fund invests principally in equity securities of companies from a variety of industries, stocks with attractive dividend yields, long and short-term debt securities and debt securities that are rated below investment grade or unrated.
- The Fund is subject to debt securities risk, market risk, equity risk, credit risk, foreign currency risk, RMB Currency and Conversion risk, liquidity risk, valuation risk, volatility risk, preferred securities risk, convertible securities risk, securitisation risk, derivative instruments risk, structured notes risk, Europe and Eurozone risk, counterparty risk and class hedging risk.
- The Fund's investment in debt instruments with loss-absorption features ("LAP") are subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events which may result in a significant or total reduction in the value of such instruments. LAP may also be exposed to liquidity, valuation and sector concentration risk.
- Security lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out, which may result in a substantial loss to the Fund.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investors should not invest based on this marketing material alone. Offering documents should be read for further details, including the risk factors. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.

The charges are the fees the fund charges to investors to cover the costs of running the Fund. Additional costs, including transaction fees, will also be incurred. These costs are paid out by the Fund, which will impact on the overall return of the Fund.

Fund charges will be incurred in multiple currencies, meaning that payments may increase or decrease as a result of currency exchange fluctuations.

Investment Objective and Strategy

The Fund aims to earn income and, secondarily, to increase the value of its investments over the medium to long term.

The Fund invests principally in:

- equity securities of companies from a variety of industries such as utilities, oil, gas, real estate and consumer goods, and stocks with attractive dividend yields
- long and short-term debt securities, such as corporate, foreign and U.S. Treasury bonds
- debt securities that are rated below investment grade or unrated

The Fund can invest on an ancillary basis in:

- non-U.S. securities that are traded in the US or American Depository Receipts (limited to 25% of net assets)
- derivatives for hedging, efficient portfolio management and investment purposes

Product Features

On a temporary basis and if justified by exceptionally unfavourable market conditions, the Fund may, in order to take measures to mitigate risks relative to such exceptional market conditions in the best interests of its shareholders, hold ancillary liquid assets (i.e. bank deposits at sight, such as cash held in current accounts with a bank accessible at any time) up to 100% of its net assets.

The Fund may also, in order to achieve its investment goals and for treasury purposes, invest in bank deposits, money market instruments or money market funds pursuant to the investment restrictions. For defensive purposes, the Fund may invest up to 100% of its net assets in these instruments on a temporary basis.

The investment team uses in-depth analysis to select individual securities that it believes are undervalued and will provide the best opportunities for income and increased value over the long term.

The Fund may invest in debt instruments with loss-absorption features ("LAP") e.g. contingent convertible securities, senior non-preferred debts, etc. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund's expected total maximum investments in LAP is 30% of its net assets.

For the purpose of generating additional capital or income or for reducing costs or risks, the Fund may engage in securities lending transactions for up to 50% of its net assets, in a manner that is consistent with its investment policy. For the avoidance of doubt, any securities lending will be an ancillary activity of the Fund only.

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

Important Information

Past performance is not an indicator or a guarantee of future performance.

Distribution Yield: The Distribution Yield refers to annualized yield. The Distribution Yield is based on the most recent month's distribution and shown as an annualized percentage as of the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions. Information is historical and may not reflect current or future distributions. The formula for calculating Distribution Yield of the stated share class: $(nr/p) \times 100$. r = last dividend paid; p = month end NAV; n = distribution frequency. $n = 12$ for monthly distribution; $n = 4$ for quarterly distribution; $n = 1$ for yearly distribution.

Benchmark: The Linked 50% USA High Div Yield + 25% High Yield Very Liquid + 25% US Agg Index is composed of the Linked Blended 50% MSCI USA High Dividend Yield Index + 25% Bloomberg High Yield Very Liquid Index + 25% Bloomberg US Aggregate Index.

Performance: Effective 1 February 2019, the Fund's benchmark is Linked Blended 50% MSCI USA High Dividend Yield Index + 25% Bloomberg High Yield Very Liquid Index + 25% Bloomberg US Aggregate Index. The benchmark performance shown is derived from a combination of the Custom 50% S&P 500 + 50% Bloomberg US Aggregate Index from the fund's inception to 31 January 2019 and the Blended 50% MSCI USA High Dividend Yield Index + 25% Bloomberg High Yield Very Liquid Index + 25% Bloomberg US Aggregate Index from 1 February 2019 to current reporting period.

Top 10 Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying bonds and generally ranges from AAA (highest) to D (lowest). For unrated bonds ratings may be assigned based on the ratings of the issuer or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower rated bonds. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio.

Asset Allocation/Composition of Fund: Due to rounding, the sum of portfolio may not equal 100%.

Fees: Maximum Annual Charge includes Management Fee and Maximum Maintenance Charge.
