IMPORTANT RISK WARNINGS / FUND INFORMATION FOR HONG KONG INVESTORS

- With effect from 5 March 2018, Hang Seng China H-Share Index Fund is renamed as Hang Seng China Enterprises Index Fund.
 - Hang Seng China Enterprises Index Fund (the "Fund") is a feeder fund and an index fund. It invests solely in the Hang Seng China Enterprises Index ETF (the "Underlying Fund").
 - The Underlying Fund is listed and traded on The Stock Exchange of Hong Kong Limited. Investors should note the differences between the Fund and the Underlying Fund, including the differences in respect of fees and charges, trading channel, dealing frequency and dealing price determination and decide whether they wish to invest in the Fund or invest in the Underlying Fund directly.
 - Risks relating to the Fund Structure/Underlying Fund: As the Fund invests solely in the Underlying Fund, the Fund is exposed to such risks to which the Underlying Fund is subject.
 - Passive investment risk and tracking error risk. There can be no assurance of exact or identical replication at any time of the performance of the Index.
 - Concentration risk. The value of the Underlying Fund may be more volatile than that of a fund having a more diverse portfolio of investments, and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting mainland China/Hong Kong.
 - There may be additional fees involved when investing into the Underlying Fund, such as fees and expenses charged by the service providers of the Underlying Fund.
 - Investing in an emerging market (such as mainland China) may involve increased risks and special considerations not typically associated with investment in more developed markets.
 - RMB hedged class(es) of Units are subject to RMB currency and conversion risks. RMB is currently not freely convertible and is subject to exchange controls and restrictions. Non RMB-based investors are exposed to foreign exchange risks.
 - Currency hedged class(es) of Units are subject to currency hedging risk. The costs of hedging transactions will be reflected in the Net Asset Value of the relevant hedged class(es) of Units and Unitholders of such class(es) will have to bear the associated hedging costs, which may be significant depending on prevailing market conditions. There is no assurance that hedging will be effective.
 - The Fund is subject to the risk associated with dealing sessions. The Fund may need to make investments more frequently, may have to bear relatively higher transactions costs for investments and the Fund's performance may be adversely affected.
 - Although all transactions will be at arm's length, conflicts of interest in respect of the Fund may arise from time to time amongst the Trustee, the Manager (also acting as the manager of the Underlying Fund), the Index Provider and the trustee of the Underlying Fund which are all members of the same financial group.
 - For Income Units, payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investments. Any such distributions may result in an immediate reduction of the Net Asset Value per Unit. (The Income Units are no longer marketed to the public of Hong Kong starting from 19 January 2015.)
 - Investment involves risks and investors may lose substantial part of their investment in the Fund.
- Investors should not only base on this material alone to make investment decisions, but should read the Fund's offering documents (including the full text of the risk factors stated therein) in detail.
