Source: Bloomberg Barclays PLC. Bloomberg Barclays credit quality rating is based on the conservative average of Moody's, S&P, and Fitch. If Moody's, S&P and Fitch all provide a credit rating, the rating is the median of the three agency ratings. If only two agencies provide ratings, the rating is the more conservative rating. If only one agency provides a rating, then the rating reflects that agency's rating. If none of the agencies provide ratings, the security is considered not rated and may be assigned an equivalent rating by the investment adviser. The table does not reflect the derivatives and net unsettled positions and consequently, aggregate allocations may not add up to 100%. Negative cash position on a trade date basis is due to pending settlement of certain forward mortgage-backed securities purchases. Net unsettled positions reflect the Fund's mortgage-backed to-be-announced (TBA) transactions and other trades pending settlement. Pending settlement means a transaction traded on or before the reporting date that is anticipated to settle in the following period.

**Annualised Yield = (Dividend per Share ÷ Number of Days in the Month) x 365 ÷ Month-end NAV x 100%. The Number of Days in the 1st month is calculated from the inception date of the share class.

Please note dividend yield is for information only, it is not indicative of return of the Fund and does not imply perspective yields of the Fund. A positive distribution yield does not imply a positive return.

The Fund aims to pay dividend on a regular basis. However, dividend amount or dividend rate is not guaranteed. In respect of Distributing Shares, the Directors of the Company may at its discretion pay dividends out of the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the net asset value of the relevant shares. The Directors of the Company may determine if and to what extent distributions paid include realized capital gains and/or paid out of capital attributable to the relevant share class. [#] Hedged Class. Hedged Classes which are designated in a currency other than USD are hedged into the Base Currency of the Portfolios (i.e. USD). Further details are set out in the Hong Kong Prospectus under the section "Share Class Hedging".
