

## Hang Seng Investment Series

# Hang Seng HSI Daily (1.5x) Leveraged Fund

February 2025

### IMPORTANT RISK WARNINGS / FUND INFORMATION FOR HONG KONG INVESTORS

- With effect from 23 December 2019, Hang Seng Index Leveraged 150 Fund is renamed as Hang Seng HSI Daily (1.5x) Leveraged Fund (the "Fund").
  - The Fund seeks to match as closely as practicable, before fees and expenses, the total return performance (net of withholding tax) of the Hang Seng Index (the "Index") with a leverage factor of 1.5 on a Daily basis. There can be no assurance that such target will be achieved.
  - The Fund will obtain exposure to the Index by investing at least 70% of its Net Asset Value (this percentage may be reduced proportionately under exceptional circumstances) in SFC authorized collective investment scheme(s) with leverage being obtained through the use of borrowings, Hang Seng Index futures contracts ("HSI Futures") and/or Mini-HSI Futures. The Fund currently invests in Hang Seng Index Tracking Fund and/or Tracker Fund of Hong Kong (the "Underlying Fund").
  - The Fund may borrow up to 10% of its Net Asset Value.
  - The Fund's net derivative exposure may be more than 50% but up to 100% of its Net Asset Value.
  - The Fund magnifies the performance of the Index. Due to the Fund's leveraged exposure to the Index, a fall in the value of the Index will trigger a greater and accelerated fall in the Net Asset Value of the Fund.
  - The Fund is subject to the risks associated with investments in futures contracts including liquidity risk, valuation risk and volatility risk. The Fund invests in futures contracts which are particularly volatile.
  - The Fund is also subject to the risks relating to the fund structure/underlying fund, including concentration risk, general risks of investments associated with an emerging market (such as Mainland China). There may be additional fees involved when investing into the Underlying Fund.
  - Although all transactions will be at arm's length, conflicts of interest in respect of the Fund may arise from time to time amongst the Trustee, the Manager (also acting as the manager and the listing agent of the Underlying Fund), the Index Provider and the Trustee of the Underlying Fund which are all members of the same financial group.
  - Investment in the Fund involves significant risks, and the risks involved are not typically encountered in traditional funds. The Fund is not suitable for retail investors who would like to adopt the tradition buy-and-hold strategy.
  - Investing in the Fund involves a higher risk of loss of all, or substantial part, of the capital invested.
- Investors should not only base on this material alone to make investment decisions, but should read the Fund's offering documents (including the full text of the risk factors stated therein) in detail.

### Investment Objective

The investment objective of the Fund is to provide investors with leveraged exposure to the Hang Seng Index (the "Index"). It seeks to match as closely as practicable, before fees and expenses, the total return performance (net of withholding tax) of the Index with a leverage factor of 1.5 on a Daily basis. The Fund does not seek to achieve its stated investment objective over a period of time greater than one day.

## Investment Objective and Strategy

The investment objective of the Fund is to provide investors with leveraged exposure to Hang Seng Index (the "Index"). It seeks to match as closely as practicable, before fees and expenses, the total return performance (net of withholding tax) of the Index with a leverage factor of 1.5 on a Daily basis. The Fund will obtain exposure to the Index by investing at least 70% of its Net Asset Value in SFC authorised Collective Investment Scheme(s) with the investment objective of matching, before fees and expenses, as closely as practicable the total return performance (net of withholding tax) of the Index (currently, the Fund invests in aggregate, at least 70% of its Net Asset Value in Hang Seng Index Tracking Fund and/or Tracker Fund of Hong Kong, which are also managed by the Manager) with leverage being obtained through the use of borrowings, Hang Seng Index futures contracts and/or Mini-HSI Futures. The Fund's net derivative exposure may be more than 50% but up to 100% of its Net Asset Value.
